HAZMAT SYSTEMS INC.

✔ **SDS MANAGEMENT**

✔ **SHIPPING OF DANGEROUS GOODS**

✔ **LEARNING MANGEMENT SYSTEM (LMS)**

The SafeStation
Say goodbye to the binder once and for all!

Using the SafeStation, a revolutionary new medium, all the information your employees need is right at their fingertips, literally!

KEY FEATURES

✔ Access SDSs and additional safety information, such as first aid, handling, classifications, safety equipment, all in a few seconds

✔ Print fully compliant labels, including GHS labels, for your secondary containers

✔ Access safety procedures, permits, forms, layouts, maps, or any other type of document you wish to transmit to your employees

✔ Access training, take courses and exams through our fully integrated Learning Management System (LMS)

✔ Communicate with emergency contacts and services using the built-in microphone and speaker

WHY THE SAFESTATION AND NOT JUST AN ONLINE SOFTWARE?

✔ **Extreme user-friendliness** - You don't have to know how to use a computer to use the SafeStation. It has been designed to be unbelievably easy to use. Even the training video on how to use the system is on the system itself

✔ **Installed directly in the worker's environment** - No need to ask a supervisor to get access to an SDS, a document or to print a label. Everything is literally right at your fingertips

✔ **No dependence to the Internet** - An online-only solution will often not get approved by your governing health & safety agency because of its dependence on an Internet connection. This is not a problem with the SafeStation, since every unit has its own local database. Internet is only required to update the unit

✔ **Install in just about any environment** - The SafeStation is built to withstand just about anything you can throw at it, including dust, humidity, heat, cold, etc. Hazmat Systems also offers a model that can go outside or an intrinsically safe model

✔ **Paper if need be** - Each SafeStation can be connected to a local or network printer, allowing you to print any document, including SDSs and labels, on demand

✔ **Say goodbye to the binder** - Because of all the features mentioned above, we can truly say that we can eliminate the binders, both for SDSs and any other document, in just about every situation

Online interface
Safety information accessible from anywhere

Through Hazmat Systems' online interface, you can quickly and easily view and maintain tons of information necessary for your employees.

KEY FEATURES

✔ Hazmat Systems prides itself on having the most user-friendly system on the market

✔ Online software, meaning no need to download cumbersome software or updates

✔ Accessible from any Internet-connected device (computer, laptop, smartphone, tablet, etc.)

✔ Access SDSs and even personalize information such as handling, transport, disposal, spill procedures, safety equipment, and so much more

✔ View and maintain document and procedures, including PDF files, pictures and even videos, that can later be accessed by workers online or on any SafeStation

Managed SDS service
Let us take care of everything

Let's face it, managing SDSs is a tremendous pain. From acquiring the original SDS from the manufacturer, to ensuring you have the latest ones, to getting them out to your employees…

So why continue dealing with the frustration of maintaining your SDSs up to date?

Let Hazmat Systems' dedicated team take care of keeping your SDSs current, all for a incredibly low yearly cost.

✔ Complete data entry into our easy-to-use online system, creating your own virtual binder accessible from any Internet-connected device (computer, laptop, smartphone, tablet, etc.)

✔ Acquisition of SDSs you may not have or that have been updated by the manufacturer

✔ Automatic notification to inform you if an SDS is over 3 years old, and if an SDS has been updated
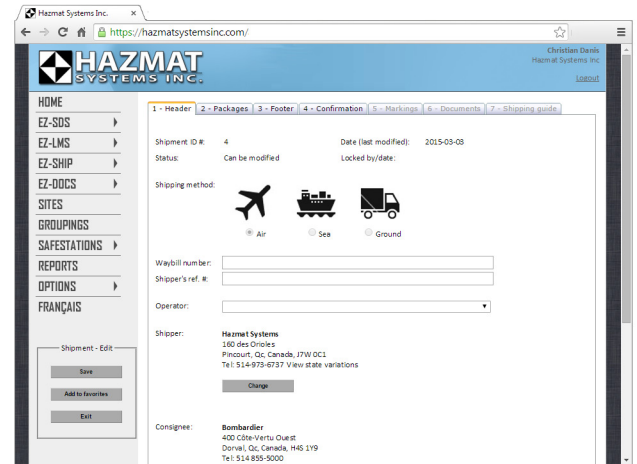

✔ SDS authoring and translation by qualified professionals

EZ-Ship
Shipping dangerous goods just got EZ!

Shipping dangerous goods doesn't have to be complicated! With EZ-Ship by Hazmat Systems, creating fully compliant paperwork required to ship dangerous goods is a breeze!

KEY FEATURES

✔ Without a doubt the easiest and most complete DG software available on the market

✔ Always up to date with the latest rules and regulations for air, sea and ground (IATA, IMDG, TDG, 49 CFR)

✔ Enter packages, items, and overpacks without having to worry about the order in which they are entered

✔ View all the rules and regulations on screen, including operator and state variations, special provisions and even packing instructions

✔ Easily print out all the markings required for each package on standard Avery labels

✔ Linked with Hazmat Systems' revolutionary SDS management solution

WHY USE EZ-SHIP?

✔ **Extreme user-friendliness** - Just like our entire line of award winning software, EZ-Ship is unbelievably easy to use, greatly simplifying shipping dangerous goods

✔ **Unique features** - With our Visual Shipping Guide that shows you the correct markings to put on each package, and our HSI QR Codes, which will show drivers the placards necessary for each shipment, Hazmat Systems' EZ-Ship is truly the best!

✔ **Say goodbye to the book** - For aerial shipment, not only do you have access to state and operator variations, but we also added all the packing instructions. All the specific information you need to prepare your shipments is right at your fingertips!

✔ **Online software** - No need to install software, perform updates, maintain data and backups. We take care of everything for you.

✔ **Rules and regulations** - We are always up to date with all the rules and regulations regarding international shipping, ensuring full compliance for your shipments.

✔ **Affordable** - Our entire suite is priced affordably, with low monthly fees

With our incredible Visual Shipping Guide, you will be able to instantly know which markings need to be added to each package and overpack, eliminating costly mistakes.

✔ View in real-time all necessary markings for each packages and even overpacks, eliminating guess work

✔ Up to date with all international rules and regulations (air, sea, ground)

✔ See all the placards necessary for trucks picking up the shipment

EZ-Placard
## Automatic placard calculator

Calculating the right placards can become a very time consuming process... unless you have EZ-Placard!

Using any internet connected device (smartphone, tablet, PC) running any OS (Windows, Android, iOS, BlackBerry), our mobile app will allow you to calculate the placards requred, even for mixed loads and LTL.

For shipments created with our EZ-Ship software, customers can even add our HSI QR code directly on each package, which can then be scanned by a smartphone or talet to see the required placarding. Since everything is linked to our servers, dispatchers can even see in real-time the content of each truck right through our online interface.

No more wasted time figuring out what placards are necessary and no more fines for incorrect placarding!

Strategic Notice Tracking
Recording the who, what, when and where!

How can you track who has seen important notices ?

With our Strategic Notice Tracking tool, it's now as easy as 1, 2, 3!

1. Upload the notice to our online system

2. Assign that notice to every employee or even a group of employees

3. Employees must identify themselves to see an assigned notice using a PIN. The date, time and location of when and where he saw it is then recorded in our online system

No more employees telling you that they haven't seen a specific communication. Since everything is recorded, you now have the who, what, when and where recorded in the online database, providing you a fantastic tool in term of accountability and liability.

Learning Management System
Learning management made simple!

There are many Learning Management Systems, or LMS, out on the market, but only one that can harness the power of the SafeStation.

✓ Manage the learning of your employees: classrooms, enrollments, courses and instructors

✓ Facilitate learning of your employees by allowing them to take courses anywhere at any time, even on a SafeStation

✓ Manage and report government and industry-required training

✓ Easily build effective and customized exams

✓ Allow employees to manage their own training curriculum

✓ Rapidly see how your employees are doing in their training using the supervisor dashboard

Document management
Safety starts with knowledge

Imagine having all your documents and safety procedures stored in one central online location, accessible from any Internet-connected device, regardless of what network you are on.

Now imagine having those documents available to the worker directly in his working environment through our revolutionary SafeStation.

✓ Safety procedures

✓ Permits

✓ Forms

✓ Maps and layouts

✓ Intervention plans

✓ Or any other document that needs to be accessed by your employees

Be sure to see our video online!
